## Foreword

This manual is designed to give potential users of the 1986, 1991, 1996 and 2001 Transportation Tomorrow Survey (TTS) data an understanding of the contents of the databases maintained at the Data Management Group. Users wishing to obtain information from the databases should contact the Data Management Group or one of the following agencies:

Ministry of Transportation, Ontario  
City of Barrie  
City of Guelph  
City of Hamilton  
City of Kawartha Lakes  
City of Orillia  
City of Peterborough  
City of Toronto  
County of Peterborough  
County of Simcoe County  
County of Wellington  
GO Transit  
Regional Municipality of Durham  
Regional Municipality of Halton  
Regional Municipality of Niagara  
Regional Municipality of Peel  
Regional Municipality of York  
Toronto Transit Commission  
Town of Orangeville

Users should be aware of the differences in both the content and the areas covered by the survey in each of the four years. This guide is a compilation of information from the original dataguides for the 1986 (Version 3.1), 1991 (Version 4.1), and 1996 (Version 2.1) databases with comparable information for the 2001 survey (Version 1.0).

The TTS databases contain the following number of survey records:

***Exhibit 1: TTS Databases Number of Records***

# **1 Differences Between the 1986, 1991, 1996 and 2001 Data**

Users of TTS data should be aware of the following differences when making comparisons between the 1986, 1991, 1996 and 2001 Transportation Tomorrow Surveys:

## **Survey Area**

The 1986 survey covered the Greater Toronto Area (GTA) defined as the Municipality of Metropolitan Toronto plus the Regional Municipalities of Durham, York, Peel, Halton and Hamilton.

In 1991, the survey area was expanded to cover the municipalities adjacent to the GTA boundary, referred to as the 'fringe area'.

Extending well beyond the boundaries of either of the earlier surveys, the 1996 survey includes all of the GTA plus Peterborough County (partial coverage), City of Peterborough, Victoria County, Town of Orangeville, Simcoe County (partial coverage), City of Barrie, Wellington County (partial coverage), City of Guelph, Waterloo Region and Niagara Region. A small portion of Dufferin County adjacent to the town of Orangeville is also included. Northumberland County is partially represented by interviews conducted during the training of interviewers (week 0).

In 2001, changes to the survey area relative to the 1996 TTS were the inclusion of the whole of Simcoe County, the addition of the City of Orillia, and the exclusion of the Regional Municipality of Waterloo and Northumberland County.

## **Minimum Age**

In 1986 the minimum age of persons for which trip data was collected was 6. In 1991, 1996 and 2001 the minimum age was 11. Trip data for persons aged 6 through 10 should be excluded from the 1986 survey before making comparisons with 1991, 1996 and/or 2001.

## **Bicycle Trips**

In 1986 information on bicycle trips was only collected for trips to or from school or work. In 1991, 1996 and 2001 information was collected for all bicycle trips.

## **Trip Start Times**

In 1986, trip start times were not recorded for some school trips made by persons under the age of 14. In 1991, 1996 and 2001 trip start time was recorded for all trips. This difference must be allowed for in making comparisons of trip start time distributions, particularly for walk, cycle, schoolbus and, to a lesser extent, transit trips.

## **Trip Purpose**

In 1986, shopping, entertainment and personal business trips were recorded as three separate trip purposes. In 1991, these trip purposes were included under the 'other' category. In 1996 and 2001, shopping was again distinguished as a separate trip purpose.

In 1991, 1996 and 2001, daycare was recorded as a separate trip purpose. In 1986, trips to daycare would most likely have been included in the 'facilitate passenger' category.

### **Usual Place of Work, Availability of Free Parking at Work, School Location**

Usual place of work, availability of free parking at work and school location were collected in 1991, 1996 and 2001 but not in 1986. In 2001, school names were recorded and kept in the final database.

### **Employment and Student Status**

In 1986 student and employment status information were collected regardless of age but were recorded as a single attribute (i.e. either employed or a student, but not both). In 1991, 1996 and 2001 employment and student status were recorded as two separate attributes to allow for all combinations of full and part time status (except full time employed at the same time as full time student, which was not allowed). In 1991, 1996 and 2001 employment and student status information were not collected for persons under the age of 11. Here persons aged from 6 to 10 are assumed to be full time students.

### **Dwelling Unit Type**

Townhouse was added as a dwelling unit type in 1996 and 2001.

### **Transit Pass, Occupation, No Work Trip**

Possession of a transit pass, occupation description and confirmation if a full-time employed person did not make a work trip on the trip day were collected in 1996 and 2001 but not in 1991 or 1986.

### **Sample Selection**

The 1986 and 1996 surveys are based on a random selection of households throughout the survey area, 4.2% in 1986 and 5.0% in 1996. The 1991 survey used different sampling rates for high and low growth areas. The target was 5% in the high growth areas and 0.5% in the low growth areas. There is significantly more variance due to random sampling in the 1991 data than for 1986 and 1996, particularly in those areas sampled predominantly at the 0.5% rate such as City of Toronto. The 2001 survey does not consist of a random selection of households. The sample selection and sample control process were based on Forward Sortation Areas (FSAs) – the 1<sup>st</sup> 3 characters of the postal code. Some FSAs were sampled at a higher rate than others were, and within most FSAs, apartment buildings are known to be under-represented relative to other types of housing. For more information on sample selection, please refer to “Joint Program in Transportation Report #94, 2001 Transportation Tomorrow Survey: Design and Conduct of the Survey, January 2003”.

### **Interview Language**

The language in which interviews were conducted was recorded but is not included in the final database since it was not considered to be a meaningful piece of information with respect to either household demographics or travel behaviour. In 2001, additional languages in which interviews were conducted include Greek, Hindi, Mandarin, Russian and Spanish. The following table provides a summary of the number of non-English interviews conducted in the 1986, 1996 and 2001 surveys. There were virtually no non-English interviews conducted in 1991 due to software related problems.

## **2 Data Expansion**

The data for each of the surveys has been expanded to represent the total population of the survey area in the year of the survey. Prior to the 2001 survey, expansion factors had been calculated based on geographic areas, called expansion zones. The number of dwelling units in each expansion zone was obtained from the Canada Census and used as the control total for calculating the expansion factor. The same expansion factor is applied to all the households in an expansion zone and to all household, person and trip data associated with each household. In 2001 survey, forward sortation areas (FSA) were used as expansion zones.

Details of the expansion process and the expansion factors used in the 1986, 1991 and 1996 surveys are contained in the individual data guides for those years. Details of the 2001 data expansion are contained in the report "Joint Program in Transportation Working Paper #9, 2001 TTS Working Paper: Data Expansion". The following table provides a summary by planning district and compares the expanded totals from the survey, both for dwelling units and for population, with data from the 2001 census. Note that there are differences between FSAs and municipal boundaries. Therefore, there are some minor discrepancies in some municipalities between the expanded number of households and the number of dwelling units recorded in the census.

Differences in population result from a difference in household size being recorded in the survey relative to that obtained in the census. In addition the census population data included the inhabitants of collective residences, such as hospitals, nursing homes, prisons and reformatories, although they are not included in either the survey or the census dwelling unit count. A large part of the survey was carried out in the fall whereas the census data was collected in May. The difference in timing could result in some differences in population particularly in areas with a significant post secondary school population. The reported difference in total population between the 2001 survey and the census at 2.9% compares with the differences of 2.8%, 2.4% and 2.8% in the 1986, 1991 and 1996 surveys respectively.

The survey data for the Regional Municipality of Niagara, the Counties of Peterborough, Simcoe and Wellington, the Cities of Barrie, Guelph, Kawartha Lakes, Orillia, and Peterborough, and the Town of Orangerville were collected in the Fall 2000. The GTA being the Regions of Durham, York, Peel, Halton, City of Hamilton and City of Toronto were surveyed in the Fall 2001 & Spring 2002. All survey data, regardless of date collected were expanded in the same manner using the 2001 census data.

## 4 Traffic Zones

Although the zone system used in the TTS surveys is called GTA zone system, it extends to the areas external to GTA. In the 2001 TTS, The 1996 GTA zone numbering system has been extended to include non-GTA areas included in the 2001 survey. The following table illustrates the correspondence between the revised GTA zone numbering and the internal zone numbering system used by each non-GTA agency.

### **General Codes**

The codes '0' and '8888' are used where a traffic zone specification is not applicable. Individuals who are not employed or are not students are assigned a zone code of '0' in the applicable zone field. Individuals who have no usual place of work or school are assigned the code to '8888' in the zone field.

'9998' identifies points that are external to the survey area.

'9999' identifies points that are unknown.

## 6 Control Totals For TTS

### 6.1 Household Tabulations

The following tabulations are “number of households” stratified by various categories in the database. The “Number of Records” is the actual number of survey records in the Household file while the “Expanded Frequency” is the total after the expansion factors have been applied.

## 6.2 Person Tabulations

The following tabulations are “number of persons” stratified by various categories in the database. The “Number of Records” figures present the actual number of survey records in the Person file while the “Expanded Frequency” figures are the expanded results representing the universe.

### **Exhibit 20: Person Tabulations**

## 6.3 Trip Tabulations

The following tabulations are “number of trips” stratified by various categories in the database. The “No. of Records” figures present the actual number of survey records in the Trip file while the “Expanded Freq” figures are the expanded results representing the universe. Trips are collected for persons aged 6 and over in 1986 and for persons aged 11 and over in 1991, 1996 and 2001.

## 6.4 Transit Tabulations

The following tabulations are “number of transit trips” stratified by various categories in the database. The “# of Records” figures present the actual number of survey records in the Transit file while the “Freq” figures are the expanded results representing the universe. Trips are collected for persons aged 6 and over in 1986 and for persons aged 11 and over in 1991, 1996 and 2001.

Notes:

- The number of trips for the TTC and GO has been calculated from the number of trip records for which the appropriate field, n\_subway (TTC subway & RT), n\_ttc\_bus (TTC bus or streetcar), n\_go\_rail (GO rail), n\_go\_bus (GO bus), is greater than zero. The other totals are tabulated from the oper\_code field (last non-TTC, non-GO route).
- The trip total does not match the total in the previous tabulations due to the double counting of people who use a combination of TTC, GO Transit and other municipal transit services.
