## Foreword

This manual is designed to give potential users of the 1986, 1991 and 1996 Transportation Tomorrow Survey (TTS) data an understanding of the contents of the databases maintained at the Data Management Group. Users wishing to obtain information from the databases should contact the Data Management Group or one of the following agencies:

Ministry of Transportation, Ontario  
GO Transit  
Municipality of Metropolitan Toronto  
Toronto Transit Commission  
Regional Municipality of Durham  
Regional Municipality of Halton  
Regional Municipality of Hamilton-Wentworth  
Regional Municipality of Waterloo  
Regional Municipality of Niagara  
Regional Municipality of Peel  
Regional Municipality of York  
Town of Orangeville  
Peterborough County  
Simcoe County  
Victoria County  
Wellington County  
City of Barrie  
City of Guelph  
City of Peterborough

Users should be aware of the differences in both the content and the areas covered by the survey in each of the three years. This guide is a compilation of information from the original dataguides for the 1986 (Version 3.1) and 1991 (Version 4.1) databases with comparable information for the 1996 survey (Version 2.1).

The TTS databases contain the following number of survey records:

### ***Exhibit 1: TTS Databases Number of Records***

	1986 (Version 3.1)	1991 (Version 4.1)	1996 (Version 2.1)
Household	61,453	24,507	115,193
Person	171,086	72,496	312,781
Non Transit Trips	313,633	142,453	587,676
Transit Trips	56,615	14,896	70,295

## Differences Between the 1986, 1991 and 1996 Data

Users of TTS data should be aware of the following differences when making comparisons between the 1986, 1991 and 1996 Transportation Tomorrow Surveys:

### 1. Survey Area

The 1986 survey covered the Greater Toronto Area (GTA) defined as the Municipality of Metropolitan Toronto plus the Regional Municipalities of Durham, York, Peel, Halton and Hamilton-Wentworth.

In 1991 the survey area was expanded to cover the municipalities adjacent to the GTA boundary, referred to as the 'fringe area'.

Extending well beyond the boundaries of either of the earlier surveys, the 1996 survey includes all of the GTA plus Peterborough County (partial coverage), City of Peterborough, Victoria County, Town of Orangeville, Simcoe County, City of Barrie, Wellington County (partial coverage), City of Guelph, Waterloo Region and Niagara Region. A small portion of Dufferin County adjacent to the town of Orangeville is also included. Northumberland County is partially represented by interviews conducted during the training of interviewers (week 0).

### 2. Minimum Age

In 1986 the minimum age of persons for which trip data was collected was 6. In 1991 and 1996 the minimum age was 11. Trip data for persons aged 6 through 10 should be excluded from the 1986 survey before making comparisons with 1991 and/or 1996.

### 3. Bicycle Trips

In 1986 information on bicycle trips was only collected for trips to or from school or work. In 1991 and 1996 information was collected for all bicycle trips.

### 4. Trip Start Times

In 1986, trip start times were not recorded for some school trips made by persons under the age of 14. In 1991 and 1996 trip start time was recorded for all trips. This difference must be allowed for in making comparisons of trip start time distributions, particularly for walk, cycle, schoolbus and, to a lesser extent, transit trips.

### 5. Trip Purpose

In 1986, shopping, entertainment and personal business trips were recorded as three separate trip purposes. In 1991, these trip purposes were included under the 'other' category. In 1996, shopping was again distinguished as a separate trip purpose.

In 1991 and 1996, daycare was recorded as a separate trip purpose. In 1986, trips to daycare would most likely have been included in the facilitate passenger category.

**6. Usual Place of Work, Availability of Free Parking at Work, School Location**

Usual place of work, availability of free parking at work and school location were collected in 1991 and 1996 but not in 1986.

**7. Employment and Student Status**

In 1986 student and employment status information were collected regardless of age but were recorded as a single attribute (i.e. either employed or a student, but not both). In 1991 and 1996 employment and student status were recorded as two separate attributes to allow for all combinations of full and part time status (except full time employed at the same time as full time student, which was not allowed). In 1991 and 1996 employment and student status information were not collected for persons under the age of 11. Here persons aged 6 - 10 are assumed to be full time students.

**8. Dwelling Unit Type**

Townhouse was added as a dwelling unit type in 1996.

**9. Transit Pass, Occupation, No Work Trip**

Possession of a transit pass, occupation description and confirmation if a full-time employed person did not make a work trip on the trip day were collected in 1996 but not in 1991 or 1986.

**10. Tarm Zones**

Geographic data were assigned to the 1979 TARMS zone system in 1986 and 1991 but not currently for 1996. Data for all three years have been assigned to the 1991 GTA zone system.

**11. Sample Selection**

The 1986 and 1996 surveys are based on a random selection of households throughout the survey area, 4.2% in 1986 and 5.0% in 1996. The 1991 survey used different sampling rates for high and low growth areas. The target was 5% in the high growth areas and 0.5% in the low growth areas. There is significantly more variance due to random sampling in the 1991 data than for 1986 and 1996, particularly in those areas sampled predominantly at the 0.5% rate such as Metro Toronto.

**12. Interview Language**

The language in which interviews were conducted was recorded but is not included in the final database since it is not considered to be a meaningful piece of information with respect to either household demographics or travel behavior. The following table provides a summary of the number of non-English interviews conducted in both the 1986 and 1996 surveys. There were virtually no non-English interviews conducted in 1991 due to software related problems.

**Exhibit 2: Interview Language 1986, 1996**

	1986		1996	
	<u>Interviews</u>	<u>%</u>	<u>Interviews</u>	<u>%</u>
Cantonese	107	0.2	1,418	1.2
English	60791	98.9	112,808	97.9
French	60	0.1	25	0.0
Italian	243	0.4	549	0.5
Portuguese	107	0.2	340	0.3
Other	145	0.2	53	0.1

## Data Expansion

The data for each of the surveys has been expanded to represent the total population of the survey area in the year of the survey. Expansion factors have been calculated based on geographic areas, called expansion zones. The number of dwelling units in each expansion zone was obtained from the Canada Census and used as the control total for calculating the expansion factor. The same expansion factor is applied to all the households in an expansion zone and to all of the household, person and trip data associated with each household.

Details of the expansion process and the expansion factors used in the 1986 and 1991 surveys are contained in the individual dataguides for those years. Details of the 1996 data expansion are contained in the 1996 TTS Working Paper #5 - Data Expansion. The following table provides a summary by planning district and compares the expanded totals from the survey, both for dwelling units and for population, with data from the 1996 census. In areas where there is an exact match between municipal boundaries and census tract boundaries used to define the expansion zones, there should be an exact match between the expanded number of households and the number of dwelling units recorded in the census. Minor differences are the result of differences in the boundaries. Major differences occur only where it was necessary to form expansion zones that crossed municipal boundaries in order to have a sufficient number of households to be statistically reliable.

Differences in population result from a difference in household size being recorded in the survey relative to that obtained in the census. In addition the census population data included the inhabitants of collective residences, such as hospitals, nursing homes, prisons and reformatories, although they are not included in either the survey or the census dwelling unit count. The survey was carried out in the fall whereas the census data was collected in June. The difference in timing could result in some differences in population particularly in areas with a significant post secondary school population. The reported difference in total population between the 1996 survey and the census at 2.7% compares with the differences of 2.8% and 2.4% in the 1986 and 1991 surveys respectively.

The survey data for the Regional Municipality of Waterloo was collected in the fall of 1995 but has been expanded using the 1996 census data in the same manner as the rest of the survey area where data was collected in the fall of 1996.

## TTS Traffic Zones

A new traffic zone system is defined for the 1996 TTS. The boundary system covers the entire survey area and matches with the individual agencies' street networks used for coding the survey data. This is accomplished by converting all the street networks into a custom map projection. Regional, county and city boundaries are adjusted such that they align with each other without overlaps or gaps. This customization implies that the 1996 TTS traffic zone boundary file is only applicable to the 1996 survey data and should not be used for any other purposes.

The 1996 TTS traffic zone system is created by combining the traffic zones for areas which have traffic zones defined and supplementing it with municipal boundaries for areas which do not have traffic zones. Each traffic zone is assigned a unique six digit number for identification. The first two digits are always the Census Division (CD) numbers and the remaining four digits are combinations of Census Sub-Division (CSD) numbers and local traffic zone numbers.

### ***Greater Toronto Area***

TTS traffic zones in the GTA are based on the 1991 GTA zone system. The numbers are defined by appending the two digit CD number with the four digit GTA traffic zone number. When the GTA number is less than four digits, zeros are padded to the beginning to form a four digit code. For example, traffic zone 1 in Metro Toronto is considered as zone 0001 and thus defined as TTS zone 200001.

Metro Toronto	20	_____	(0001 - 0460)
Durham Region	18	_____	(0501 - 0710)
York Region	19	_____	(0801 - 0978)
Peel Region	21	_____	(1101 - 1325)
Halton Region	24	_____	(1401 - 1563)
Hamilton Region	25	_____	(1601 - 1770)

### ***Regions External To The Greater Toronto Area***

For areas outside of the GTA, the numbering procedure depends on whether the entire region or county is surveyed or not.

#### (i) Regions and Counties Surveyed in Whole

The municipalities of Niagara Region, Victoria County and Waterloo Region all have their entire region surveyed and each has a local traffic zone system. The TTS traffic zone numbers for the 3 areas are defined similarly to the GTA. That is, by combining the two digit CD number with a four digit equivalent of the local traffic zone number.

Niagara Region	26 _ _ _ _	(0001 - 0364)
Waterloo Region	30 _ _ _ _	(0001 - 0275)
Victoria County	16 _ _ _ _	(018x - 035x, where x = 0, 1, 2, 3)

Some adjustments are made for the traffic zones in Victoria County. Certain zones in Victoria have duplicate zone numbers with an A, B or C extension to distinguish them. In order to have a consistent numeric system throughout the survey area, the letter extensions are replaced with a number. The letter A is replaced with 1, B with 2 and C with 3. For example, Victoria traffic zone 18B is converted to 0182 and has a TTS number of 160182. Traffic zones that do not have letter extensions are assigned a 0 on the end. For example, Victoria traffic zone 21 is converted to 0210 and has a TTS number of 160210.

(ii) Regions and Counties not Surveyed in Whole

Peterborough County and Wellington County are not surveyed in whole and they do not have local traffic zone numbering. TTS traffic zone numbers are defined simply by combining the two digit CD number and the two digit truncated CSD numbers with 00 added on the end. The truncated CSD numbers is defined by dropping the leading 0 in Statistics Canada's 3 digit CSD number. Accordingly, the TTS traffic zone boundaries for Peterborough and Wellington Counties follow the local municipal boundaries.

Peterborough County 15 \_\_ 00

Wellington County 23 \_\_ 00

Simcoe County also is not surveyed entirely. However, for areas which are surveyed, a local traffic zone system is defined. TTS zone numbers for the surveyed area in Simcoe County are assembled with Simcoe County's CD number, 43, followed by the CSD number and the local two digit traffic zone number. For example, zone 21 in Simcoe County has TTS zone number 430721, where 07 is the CSD number for New Tecumseth. The CSD number is needed to differentiate traffic zones between Simcoe County and City of Barrie because both municipalities have the same CD number and start numbering their respective traffic zones at 01.

Simcoe County (surveyed area) 43 \_ \_ \_ \_ (2 digit CSD & 01 - 28)

The Canadian Forces Base Borden is defined separately from the municipality of Essa. The TTS zone number for Borden is 438528.

(iii) Local Municipalities with Traffic Zones Defined

The remaining survey areas outside the GTA are the City of Barrie, the City of Guelph, the City of Peterborough and the Town of Orangeville. These areas share the same CD number with their adjoining county and have local traffic zones defined.

The TTS zone numbers for the City of Barrie are assembled from Simcoe County's CD number, 43, followed by the City of Barrie's CSD number, 42, and the local traffic zone number in a two digit form. For example, zone 02 in the City of Barrie has TTS zone number 434202.

City of Barrie 43 42 \_\_ (01 - 32)

The TTS zone numbers for the City of Guelph are assembled from Wellington County's CD number, 23, followed by the City of Guelph's CSD number, 08, and the two digit ward number. For example, Ward 5 in the City of Guelph has TTS zone number 230805.

City of Guelph            23 08 \_\_    (01 - 06)

The TTS zone numbers for the City of Peterborough are assembled with Peterborough County's CD number, 15, followed by the City of Peterborough's CSD number, 14, and the local traffic zone number in a two digit form. For example, zone 16 in the City of Peterborough has TTS zone number 151416.

City of Peterborough    15 14 \_\_    (01 - 25)

The TTS zone numbers for the Town of Orangeville are assembled with Dufferin County's CD number, 22, followed by the Town of Orangeville's CSD number, 14, and the two digit local traffic zone number. Zone 6 is actually areas just outside of Orangeville but was included in the survey. For example, zone 4 in The Town of Orangeville has TTS zone number 221404.

Town of Orangeville    22 14 \_\_    (01 - 06)

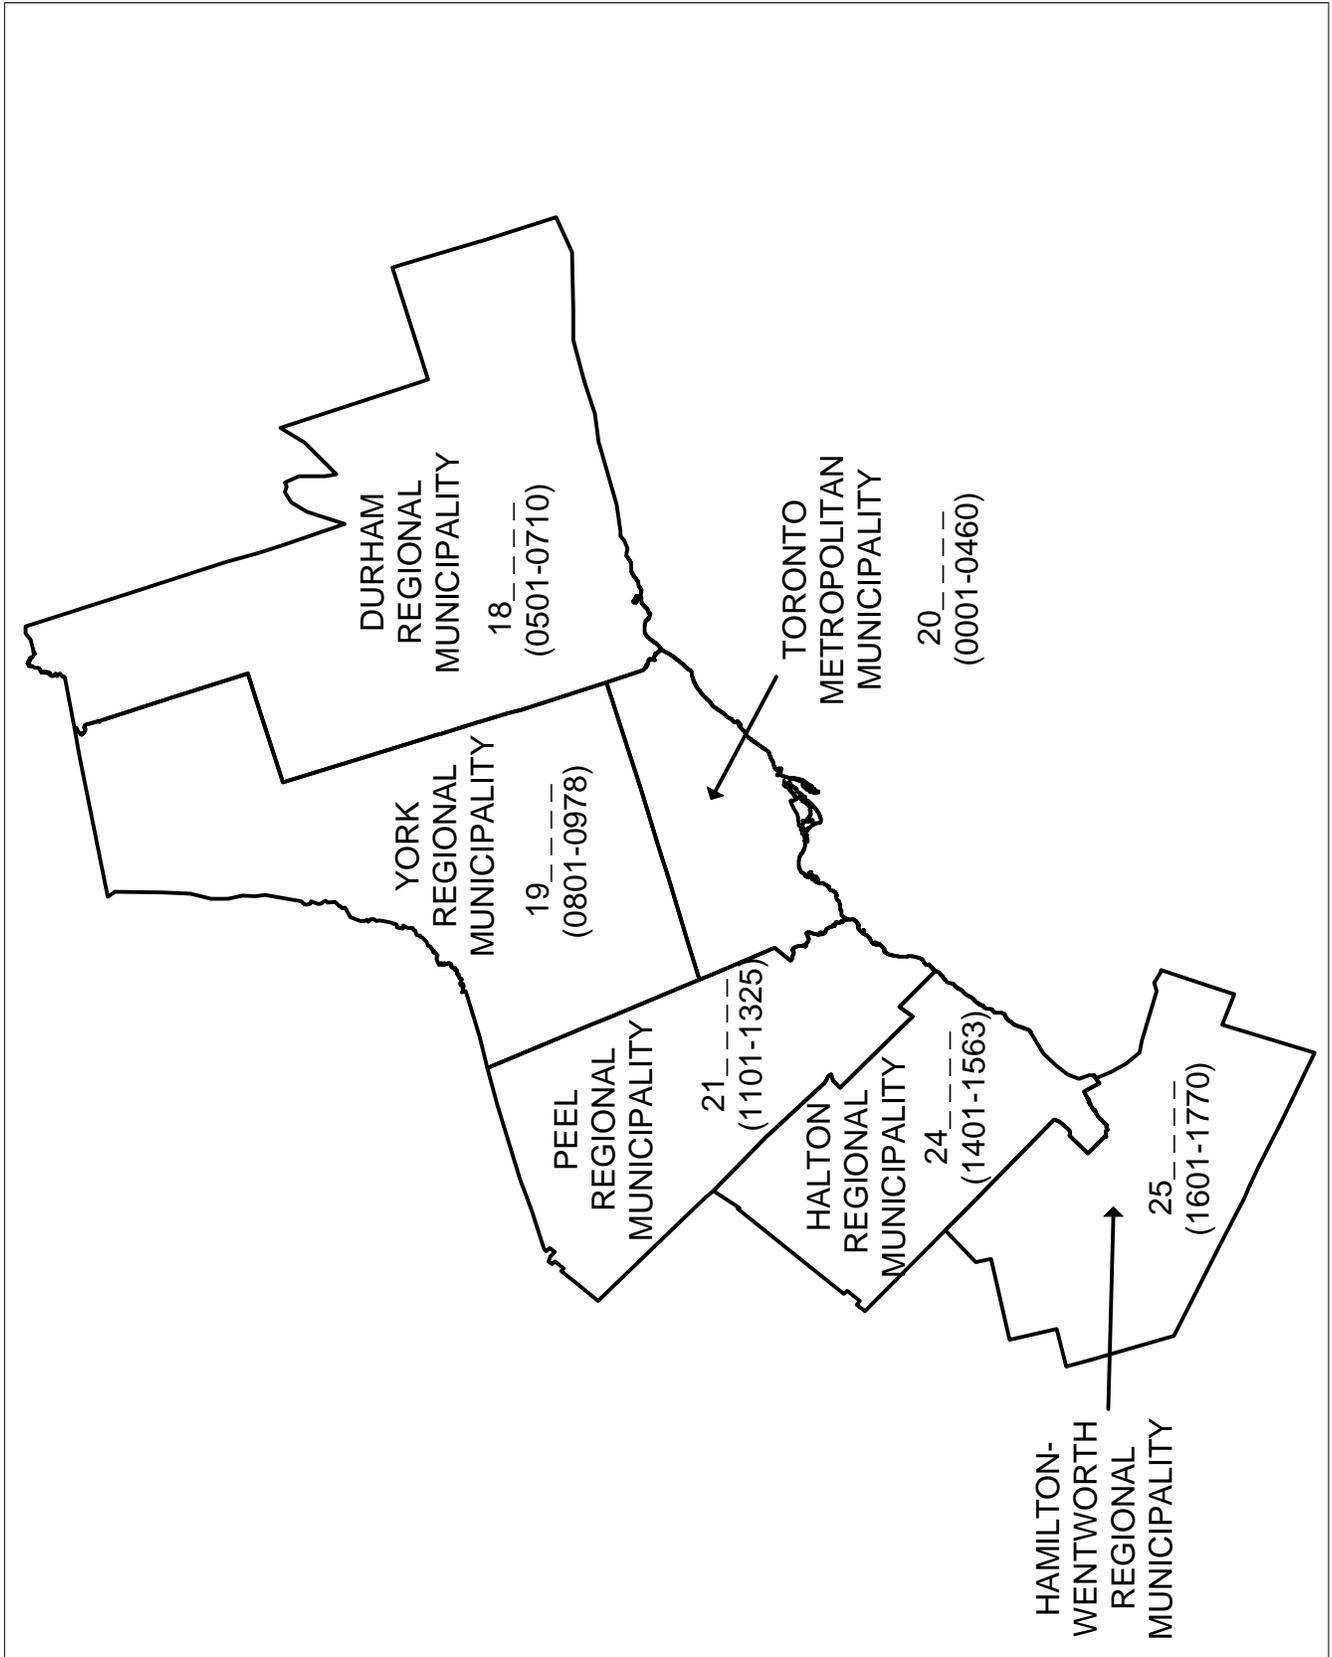

### **General Codes**

The codes '0' and '888888' are used where a traffic zone specification is not applicable. Individuals who are not employed or are not students are assigned a zone code of '0' in the applicable zone field. Individuals who have no usual place of work or school are assigned the code to '888888' in the zone field.

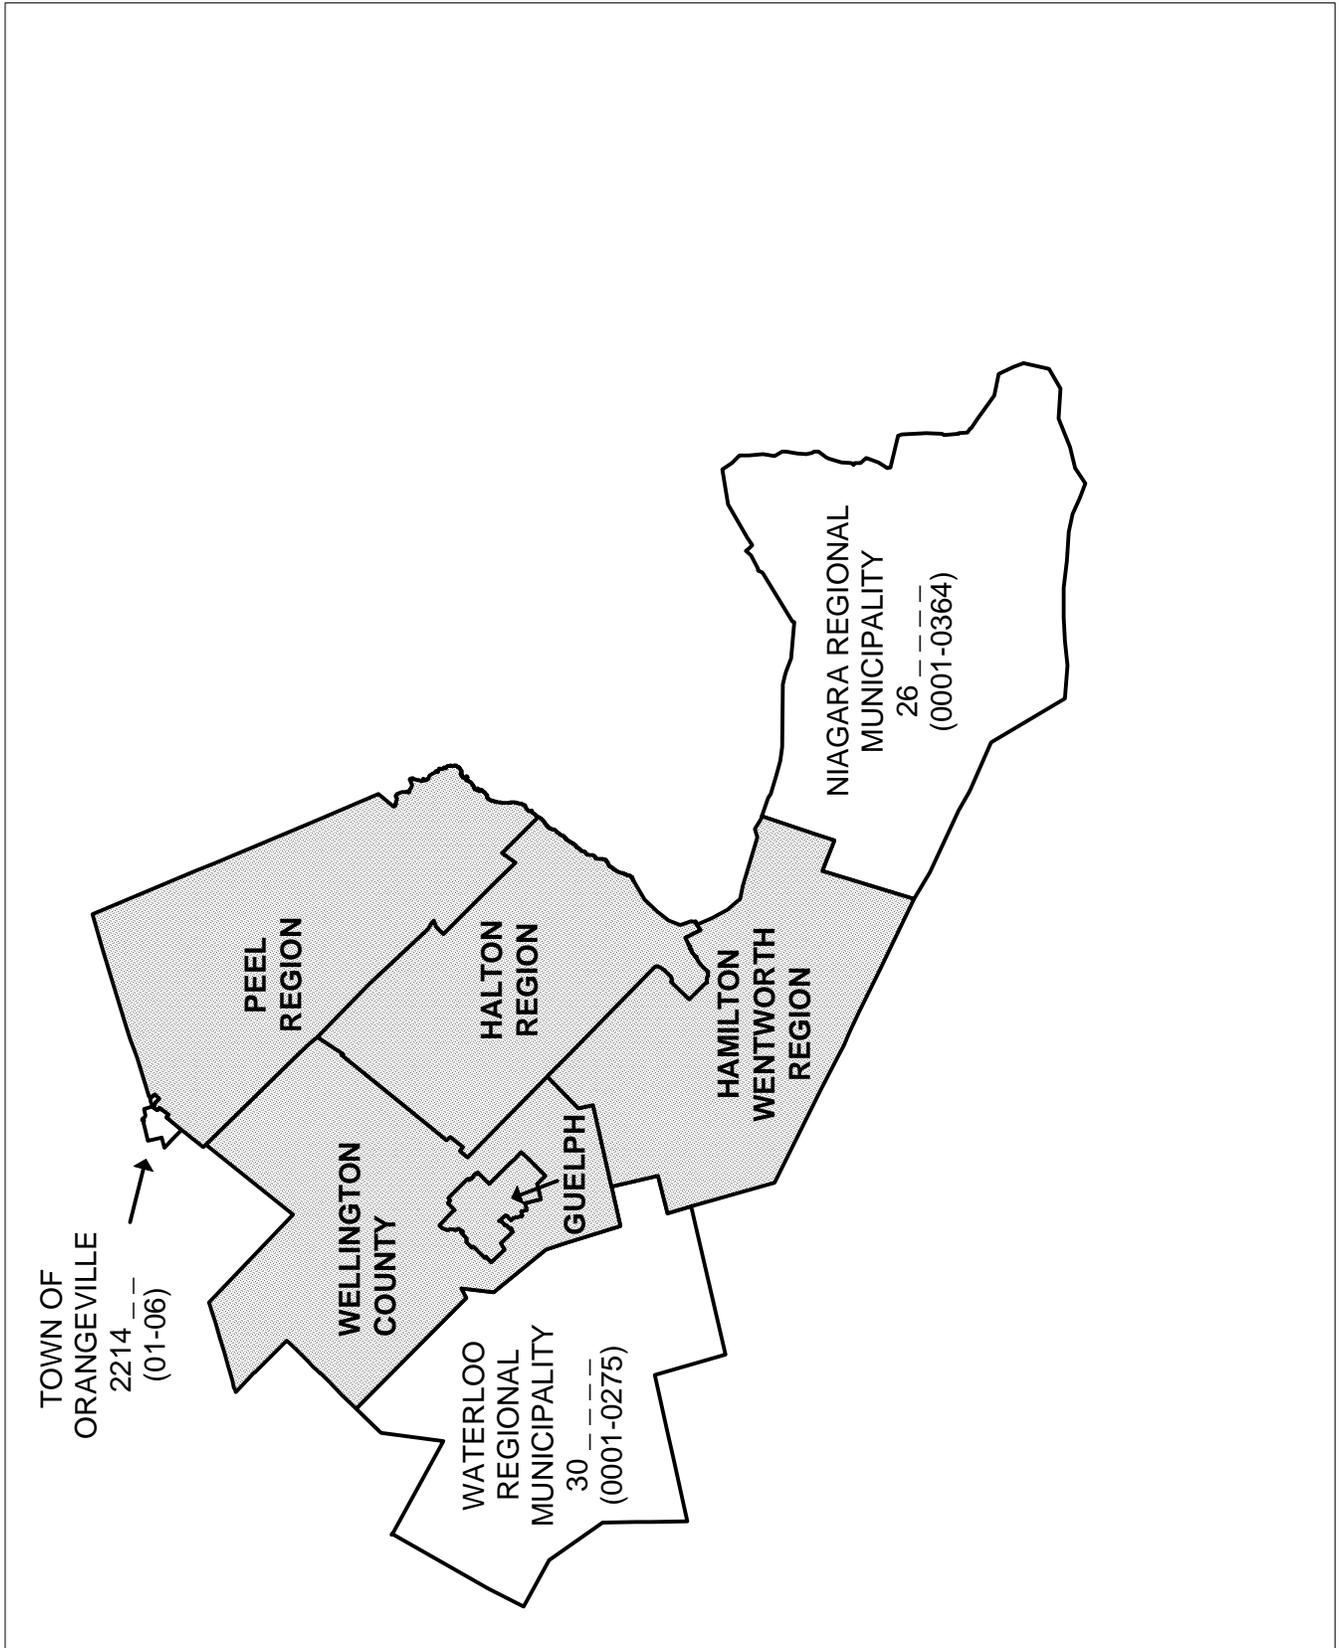

'999998' identifies points which are external to the survey area.

'999999' identifies points which are unknown.

**Exhibit 4: TTS Traffic Zone Numbering - Greater Toronto Area**

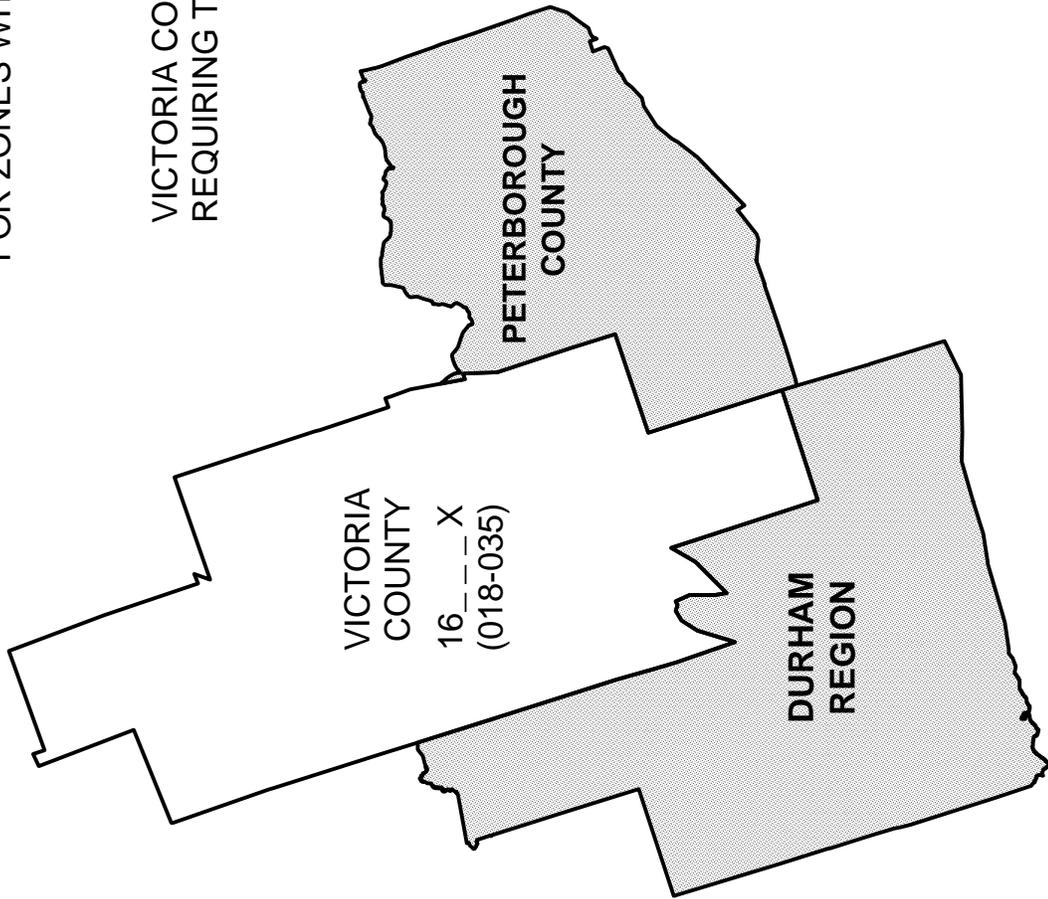

**Exhibit 5: TTS Traffic Zone Numbering - Niagara Region, Waterloo Region and the Town of Orangeville**

**Exhibit 6: TTS Traffic Zone Numbering - Victoria County**

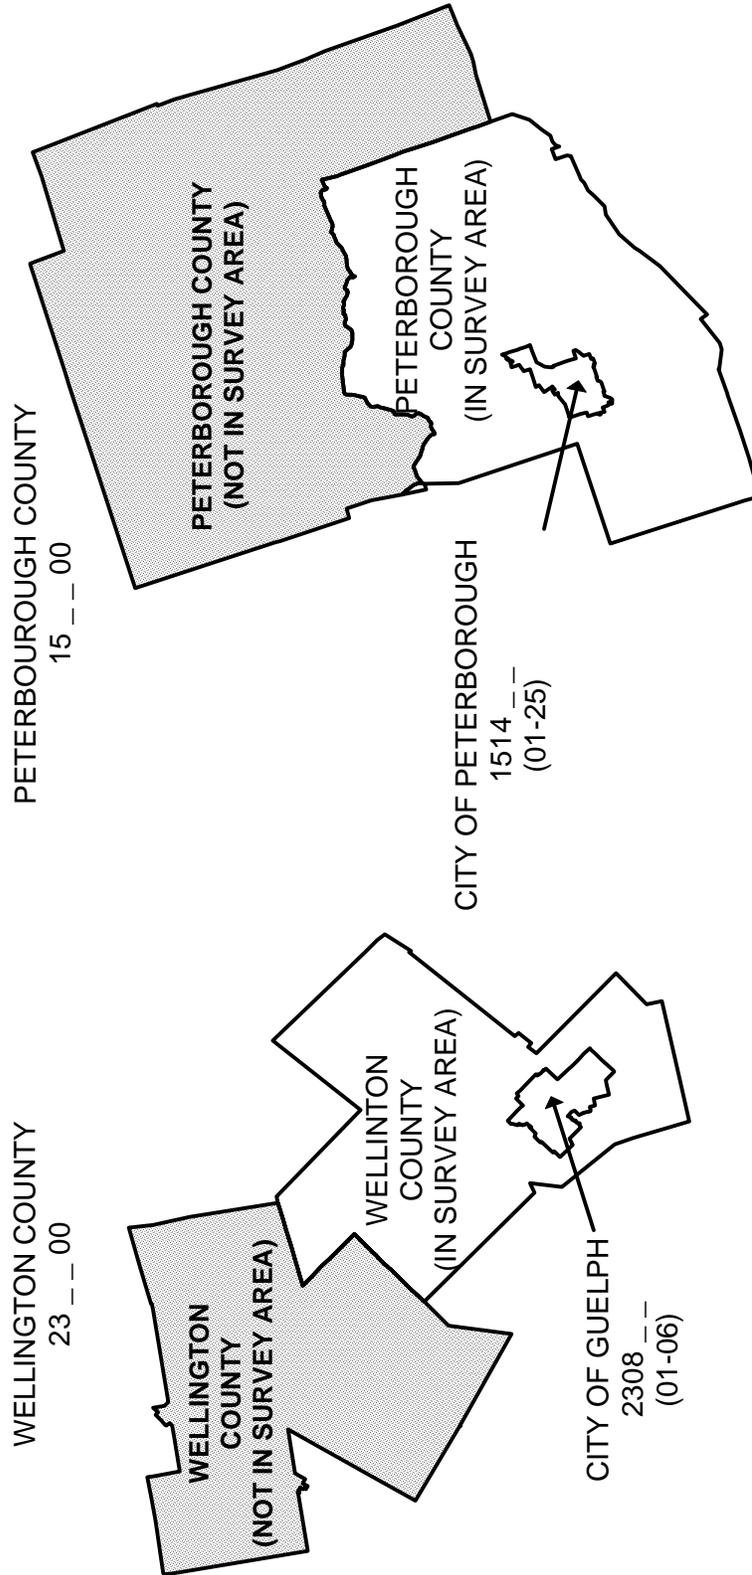

FOR ZONES WITH: A EXTENSIONS, X = 1  
B EXTENSIONS, X = 2  
C EXTENSIONS, X = 3  
NO EXTENSION, X = 0

VICTORIA COUNTY IS THE ONLY TTS REGION  
REQUIRING THIS NUMBERING CONVENTION.

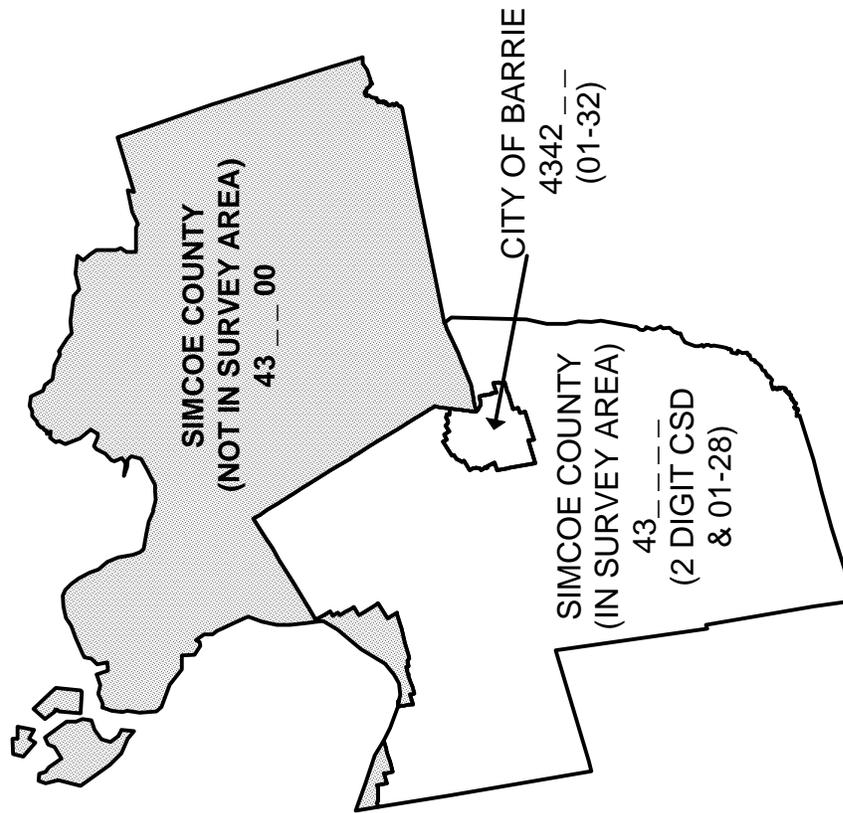

**Exhibit 7: TTS Traffic Zone Numbering - Counties of Wellington and Peterborough**

CENSUS SUBDIVISIONS WERE USED AS TRAFFIC ZONES IN WELLINGTON AND PETERBOROUGH COUNTIES (INCLUDING BOTH SURVEY AND NON-SURVEY AREAS). THE THIRD AND FOURTH DIGITS OF THE ZONE NUMBER INDICATE THE CSD.

**Exhibit 8: TTS Traffic Zone Numbering - Simcoe County and the City of Barrie**

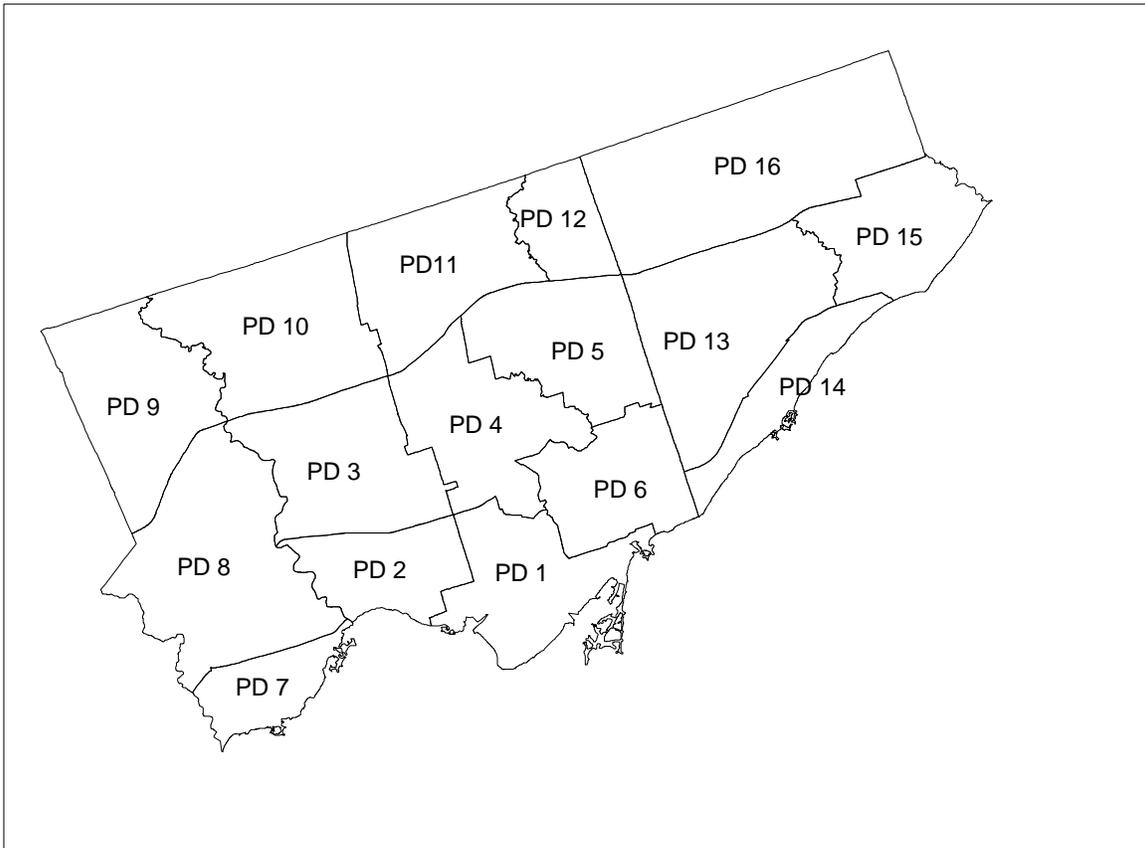

CENSUS SUBDIVISIONS WERE USED FOR TRAFFIC ZONES IN THE PORTION OF SIMCOE COUNTY OUTSIDE THE SURVEY AREA. THE THIRD AND FOURTH DIGITS INDICATE THE CSD.

# Planning Districts

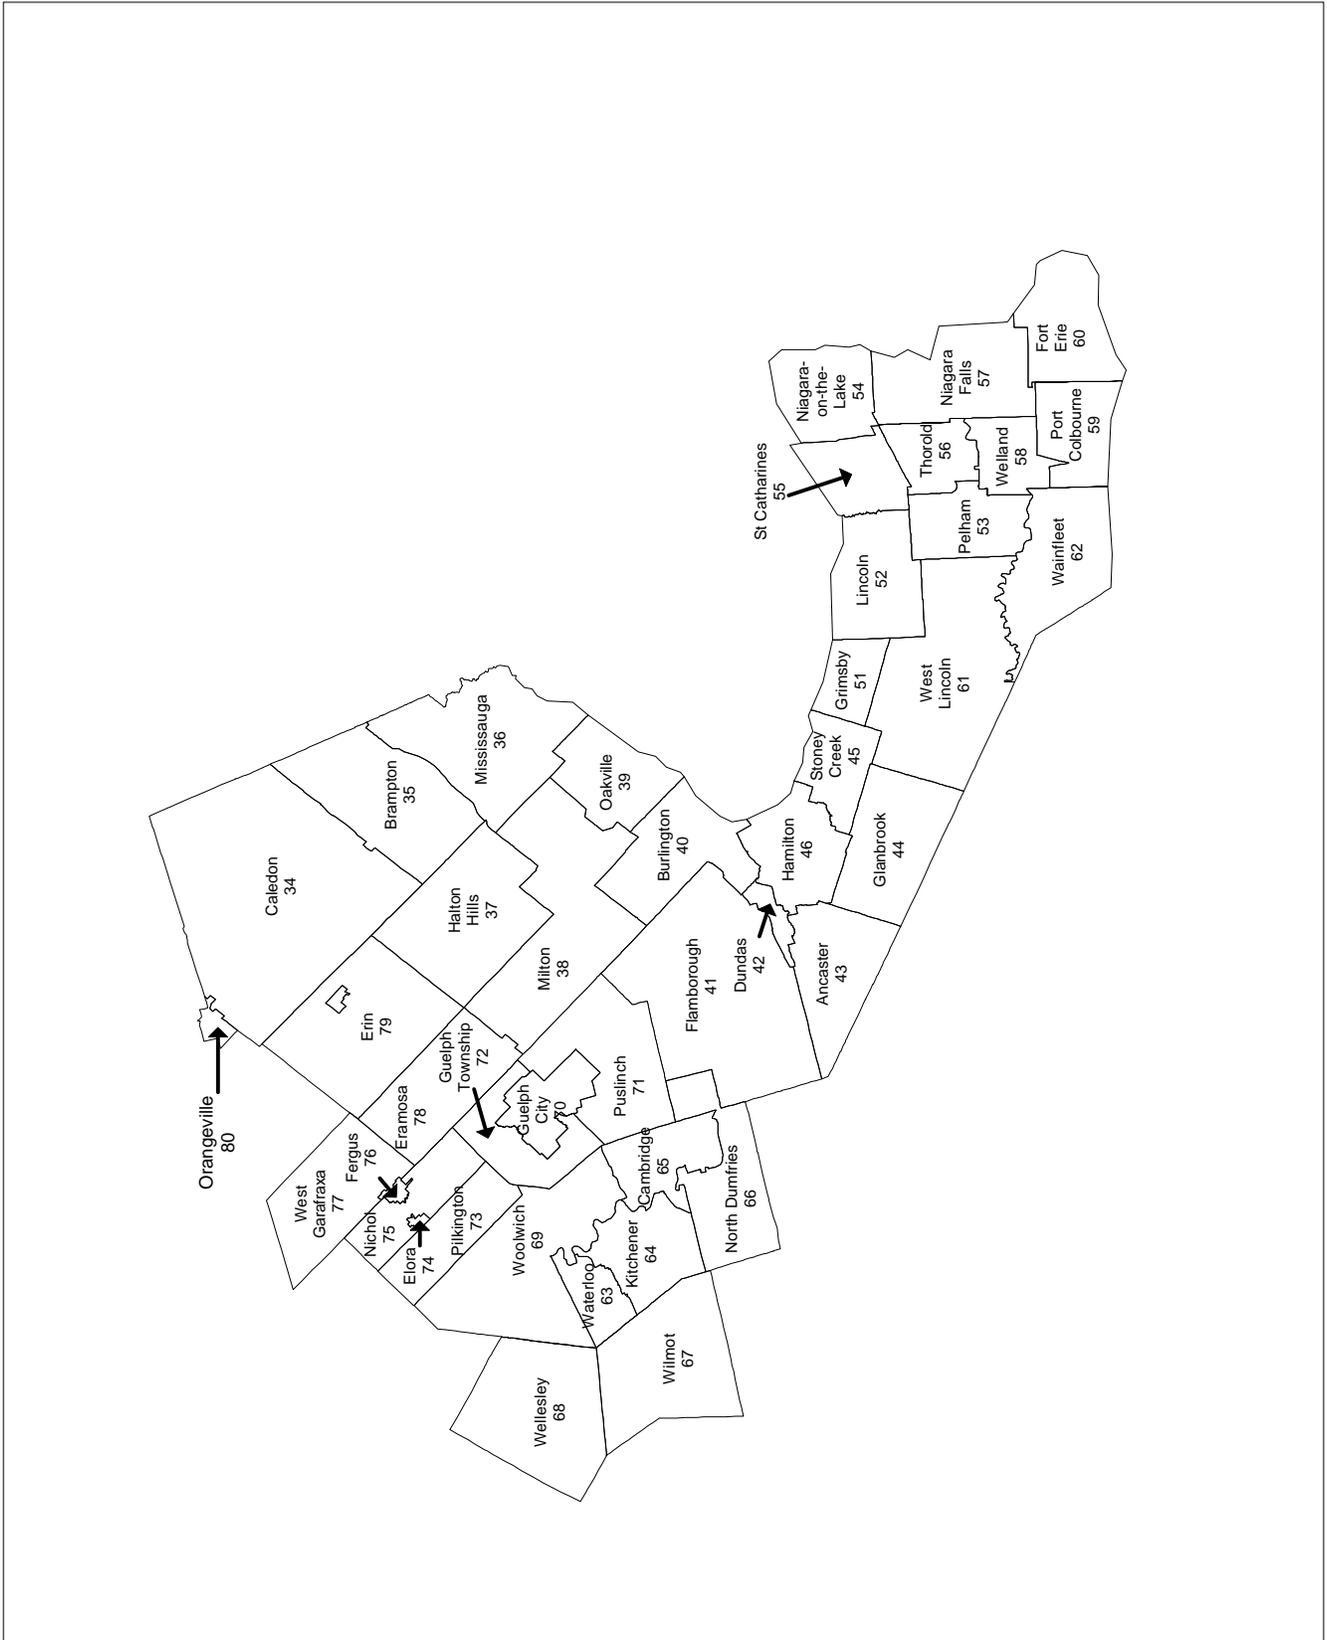

The 46 planning district system for the GTA has been extended to include survey areas external to the GTA. The numberings were assigned sequentially, in the clockwise direction, starting at 51 for Grimsby in Niagara Region and ending at 113 for Northumberland County.

**Exhibit 9: 1996 TTS Survey Area Planning Districts (Metro)**

**Exhibit 11: 1996 TTS Survey Area Planning Districts (Western Half)**

## 1991 GTA Zones

The 1991 GTA zone numbering system has been extended to include non-GTA areas included in the 1996 survey. The following table illustrates the correspondence between the revised GTA zone numbering and the internal zone numbering system used by each non-GTA agency.

### ***Exhibit 12: Non-GTA Survey Areas GTA Zone Numbering***

<u>Agency</u>	<u>Local Zone System</u>	<u>1991 GTA Zone System</u>
Niagara	1 - 364	2001 - 2364
Waterloo	1 - 275 (no zone 188)	2401 - 2675
Guelph	1 - 6	2701 - 2706
Wellington	not applicable	2707 - 2716
Orangeville	1 - 6	2721 - 2726
Simcoe	1 - 28	2751 - 2778
Barrie	1 - 32	2801 - 2832
Victoria County	not sequential	2841 - 2865
Peterborough County	not applicable	2871 - 2884
City of Peterborough	1 - 25	2901 - 2925
Northumberland	not applicable	2931 - 2946
External	not applicable	2947 - 2998
External Undefined	not applicable	3000

ct_uid	Census Canada census tract unit identification	A ten digit identifier assigned by Statistics Canada
gzon_hhld	Traffic zone of the household (1996 only)	See section 'TTS Traffic Zones' (pg. 7 - 14)
gta91_hhld	GTA zone of the household	1991 GTA Zones (pg. 18 - 20)
ex_fac	Expansion factor for the household	A five digit number
utm_x_hhld	UTM X coordinate of the household	Distance east in metres, measured from the 81 <sup>st</sup> degree longitude with a false easting of 500,000 metres
utm_y_hhld	UTM Y coordinate of the household	Distance north in metres, measured from the equator

### Household Attributes Continued

utmxo_hhld	UTM X coordinate of the household prior to allocating intersections (1996 only)	Distance east in metres, measured from the 81 <sup>st</sup> degree longitude with a false easting of 500,000 metres
utmyo_hhld	UTM Y coordinate of the household prior to allocating intersections (1996 only)	Distance north in metres, measured from the equator
dwel_type	Type of dwelling unit	1 - House 2 - Apartment 3 - Townhouse (1996 only) 9 - Unknown
gtyp_hhld	Method used to geocode household	A - Address - Block Face Address Range D - Address - Parcel Dot E - Emergency Location Code (1996 only) I - Intersection M - Monument P - Place Name Z - Traffic Zone
n_call	Number of calls or edit attempts to complete the interview	
trip_week	Weeks into the survey when trip data was collected  Refer to previous dataguides for week numbering in 1986 and 1991	For Waterloo 1995, week of survey ending: 31 - October 15, 1995 32 - October 22, 1995 33 - October 29, 1995 34 - November 5, 1995 35 - November 12, 1995 36 - November 19, 1995 37 - November 26, 1995 38 - December 3, 1995 Week of survey ending: 0 - August 31, 1996 1 - September 7, 1996 2 - September 14, 1996 3 - September 21, 1996 4 - September 28, 1996 5 - October 5, 1996 6 - October 12, 1996 7 - October 19, 1996 8 - October 26, 1996 9 - November 2, 1996 10 - November 9, 1996 11 - November 16, 1996 12 - November 23, 1996 13 - November 30, 1996 14 - December 7, 1996 15 - December 14, 1996 16 - December 21, 1996
trip_day	Day of week trip data was collected for	1 - Monday 2 - Tuesday 3 - Wednesday 4 - Thursday 5 - Friday 9 - Unknown (1986, 1991)
n_person	Number of persons in the household	1 - 9 (1991, 1996) 1 -10 (1986)
n_vehicle	Number of vehicles available for personal use in the household	0 - 99
n_licence	Number of persons possessing a driver's license in the household	0 - 9
n_emp_ft	Number of full time workers in the household	0 - 9
n_emp_pt	Number of part time workers in the household	0 - 9
n_emp_home	Number of persons who work full or part time at home in the household	0 - 9
n_student	Number of full or part time students in the household	0 - 9
n_hhld_trip	Number of household trips on trip day (1986 data includes persons aged 6-10)	0 - 99
rec_mail	Receipt of advance letter  1991 and 1996 only	Y - Yes N - No 9 - Unknown

## Person Attributes

The following data was collected or calculated for each person in the households surveyed in 1996. The attributes and categories are the same for 1986 and 1991 except as noted.

### Exhibit 16: Person Attributes

<u>Attribute</u>	<u>Description</u>	<u>Code</u>
hhld_num	Household sample number	A six digit unique identifier
pers_num	Person number within the household	1 - 9
respond	Respondent status (household member who provided information)	T - Respondent F - Not respondent (i.e., his/her information was reported by another member of the household)
age	Age of person in years	0 - 99 (in 1991 age 1 included all persons under 2 years of age) 97 - Aged 97 and older (1986) 98 - Aged 98 and older(1991 and 1996) 99 - Unknown
sex	Gender of the person	F - Female M - Male 9 - Unknown
driver_lic	Possession of a driver's license	Y - Yes N - No 9 - Unknown
tran_pass	Possession of a transit pass  New question in 1996	C - Combination or Dual Pass G - GO Transit Pass M - Metro Pass N - None O - Other Agency Pass 9 - Unknown (persons under age 11 are assumed not to have a transit pass)
emp_stat	Employment status of the person  In 1986 a person could be recorded as employed or a student but not both  In 1991 and 1996 combinations of employment and student status were allowed	F - Full time H - Work at home full time J - Work at home part time N - Not employed P - Part time 9 - Unknown (persons under 11 are assumed not to be employed)
occupation	Person's occupation type  New question in 1996	G - General Office / Clerical M - Manufacturing / Construction/ Trades P - Professional / Management / Technical S - Retail Sales and Service O - Not Employed 9 - Unknown
no_work	Whether a full time employed person who did not make a trip to usual place of work worked from home on the trip day.	N - No Y - Yes O - Not Applicable 9 - Unknown
stu_stat	New question in 1996 Student status of person  All persons aged 6 - 10 years are assumed to be full time students  In 1986 a person could be recorded as employed or a student but not both  In 1991 and 1996 combinations of employment and student status were allowed	O - Not a student P - Part time student S - Full time student 9 - Unknown

**Person Attributes Continued**

region_emp	Regional/Local municipality of person's usual place of work  Not in 1986 survey 1991 - regions 1 - 7, 88, 98, 99 1996 - regions 1 - 6, 11 - 99	0 - Not employed 1 - Metro 2 - Durham 3 - York 4 - Peel 5 - Halton 6 - Hamilton-Wentworth 7 - Fringe 11 - Niagara 12 - Waterloo 13 - Guelph 14 - Wellington 15 - Orangeville 16 - Barrie 17 - Simcoe 18 - Victoria 19 - City of Peterborough 20 - Peterborough County 88 - No usual place of work 98 - External 99 - Unknown

## ***Trip Attributes***

The following data was collected or calculated for each trip made on the trip day for each person 11 years old and older in the households surveyed in 1996. The attributes and categories are the same for 1986 and 1991 except as noted. Trip information was collected for household members 6 years old and over in 1986, and 11 and older in 1991.

### ***Exhibit 17: Trip Attributes***

<u>Attribute</u>	<u>Description</u>	<u>Code</u>
hhld_num	Household sample number	A six digit unique identifier
pers_num	Person number within the household	1 - 9
trip_num	Trip number for that person	1 - 99
start_time	Start time of the trip (24 hour clock)	0400-2800 (4a.m. on the trip day to 4a.m. the next day) 9999 - Unknown
mode_prime	Primary mode of the trip ( if any part of the trip is made by public transit, the primary mode is defined as B, G or J)	B - Public Transit (excluding GO Rail) C - Bicycle D - Auto Driver G - GO Rail J - Joint GO Rail and Public Transit M - Motorcycle O - Other P - Auto Passenger S - School Bus T - Taxi W - Walk 9 - Unknown
purp_orig	Origin purpose of the trip (the destination purpose of the previous trip, except for first trip on trip day, which is assumed to be other if the first trip does not start from home, work or school)	D - Daycare (1991 and 1996 only) E - Entertainment (1986 only) F - Facilitate passenger H - Home L - Linked trip (1991 only) M - Marketing (1986 and 1996 only) O - Other P - Personal (1986 only) S - School W - Work 9 - Unknown
region_orig	Regional municipality of trip origin  1986 - regions 1 - 6, 99 1991 - regions 1 - 7, 98 1996 - regions 1 - 6, 11 - 98	1 - Metro 2 - Durham 3 - York 4 - Peel 5 - Halton 6 - Hamilton-Wentworth 7 - Fringe 11 - Niagara 12 - Waterloo 13 - Guelph 14 - Wellington 15 - Orangeville 16 - Barrie 17 - Simcoe 18 - Victoria 19 - City of Peterborough 20 - Peterborough County 98 - External 99 - Unknown
pd_orig	Planning district of trip origin	1 to 113 (see Planning District Maps (pg. 15 - 17)) 114 - Peterborough County 115 - Hastings County 116 - Haliburton County 117 - Muskoka District Municipality 118 - Simcoe County

## Control Totals For 1996 TTS Version 2.1, 1991 TTS Version 4.1 and 1986 TTS Version 3.1

### *Household Tabulations*

The following tabulations are “number of households” stratified by various categories in the database. The “Number of Records” is the actual number of survey records in the Household file while the “Expanded Frequency” is the total after the expansion factors have been applied.

#### **Exhibit 21: Household Tabulations**

Variable: region\_hhld (regional municipality of household)

## Person Tabulations

The following tabulations are “number of persons” stratified by various categories in the database. The “# Recs” figures present the actual number of survey records in the Person file while the “Freq” figures are the expanded results representing the universe.

## Trip Tabulations

The following tabulations are “number of trips” stratified by various categories in the database. The “# Recs” figures present the actual number of survey records in the Trip file while the “Freq” figures are the expanded results representing the universe. Trips are collected for persons aged 6 and over in 1986 and for persons aged 11 and over in 1991 and 1996.

### Exhibit 23: Trip Tabulations

## Transit Tabulations

The following tabulations are “number of transit trips” stratified by various categories in the database. The “# Recs” figures present the actual number of survey records in the Transit file while the “Freq” figures are the expanded results representing the universe. Trips are collected for persons aged 6 and over in 1986 and for persons aged 11 and over in 1991 and 1996.

Notes:

1. The number of trips for the TTC and GO has been calculated from the number of trip records for which the appropriate field, n\_subway (TTC subway & RT), n\_ttc\_bus (TTC bus or streetcar), n\_go\_rail (GO rail), n\_go\_bus (GO bus), is greater than zero. The other totals are tabulated from the oper\_code field (last non-TTC, non-GO route).
2. The trip total does not match the total in the previous tabulations due to the double counting of people who use a combination of TTC, GO Transit and other municipal transit services.
