Foreword

This manual is designed to give potential users of the 1986, 1996, 2001 and 2006 Transportation Tomorrow Survey (TTS) data an understanding of the contents of the databases maintained at the Data Management Group. Users wishing to obtain information from the databases should contact the Data Management Group or one of the following agencies:

Ministry of Transportation, Ontario
City of Barrie
City of Brantford
City of Guelph
City of Hamilton
City of Kawartha Lakes
City of Orillia
City of Peterborough
City of Toronto
County of Dufferin
County of Peterborough
County of Simcoe County
County of Wellington
GO Transit
Regional Municipality of Durham
Regional Municipality of Halton
Regional Municipality of Niagara
Regional Municipality of Peel
Regional Municipality of Waterloo
Regional Municipality of York
Toronto Transit Commission
Town of Orangeville

Users should be aware of the differences in both the content and the areas covered by the survey in each of the four years. This guide is a compilation of information from the original data guides for the 1986 (Version 3.1), 1996 (Version 2.1), and 2001 (Version 1.0) databases with comparable information for the 2006 survey (Version 1.0).

The TTS databases contain the following number of survey records:

Exhibit 1: TTS Databases Number of Records

1 Differences Between the 1986, 1991, 1996, 2001 and 2006 Data

Users of TTS data should be aware of the following differences when making comparisons between the 1986, 1991, 1996, 2001 and 2006 Transportation Tomorrow Surveys:

Survey Area

The 1986 survey covered the Greater Toronto Area (GTA) defined as the Municipality of Metropolitan Toronto plus the Regional Municipalities of Durham, York, Peel, Halton and Hamilton.

In 1991, the survey area was expanded to cover the municipalities adjacent to the GTA boundary, referred to as the 'fringe area'. (The 1991 survey data is not included in this report.)

Extending well beyond the boundaries of either of the earlier surveys, the 1996 survey includes all of the GTA plus Peterborough County (partial coverage), City of Peterborough, Victoria County, Town of Orangeville, Simcoe County (partial coverage), City of Barrie, Wellington County (partial coverage), City of Guelph, Waterloo Region and Niagara Region. A small portion of Dufferin County adjacent to the town of Orangeville is also included. Northumberland County is partially represented by interviews conducted during the training of interviewers (week 0).

In 2001, changes to the survey area relative to the 1996 TTS were the inclusion of the whole of Simcoe County, the addition of the City of Orillia, and the exclusion of the Regional Municipality of Waterloo and Northumberland County.

The 2006 survey area was expanded to include Regional Municipality of Waterloo, City of Brantford and Dufferin County. Interviews were conducted in Brant County during the training of interviewers.

Minimum Age

In 1986 the minimum age of persons for which trip data was collected was 6. In 1991, 1996, 2001 and 2006 the minimum age was 11. Trip data for persons aged 6 through 10 should be excluded from the 1986 survey before making comparisons with the other surveys.

Bicycle Trips

In 1986 information on bicycle trips was only collected for trips to or from school or work. In 1991, 1996, 2001 and 2006 information was collected for all bicycle trips.

Trip Start Times

In 1986, trip start times were not recorded for some school trips made by persons under the age of 14. In the other surveys, trip start time was recorded for all trips. This difference must be allowed for in making comparisons of trip start time distributions, particularly for walk, cycle, school bus and, to a lesser extent, transit trips.

Trip Purpose

In 1986, shopping, entertainment and personal business trips were recorded as three separate trip purposes. In 1991, these trip purposes were included under the 'other' category. In 1996, 2001 and 2006, shopping was again distinguished as a separate trip purpose.

In 1991, 1996, 2001 and 2006, daycare was recorded as a separate trip purpose. In 1986, trips to daycare would most likely have been included in the 'facilitate passenger' category.

Usual Place of Work, Availability of Free Parking at Work, School Location

Usual place of work, availability of free parking at work and school location were collected since 1991. In 2001 and 2006, school names were recorded and kept in the final database.

Employment and Student Status

In 1986 student and employment status information were collected regardless of age but were recorded as a single attribute (i.e. either employed or a student, but not both). Since 1991, employment and student statuses were recorded as two separate attributes to allow for all combinations of full and part time status (except full time employed at the same time as full time student, which was not allowed). Except for 1986, employment and student status information were not collected for persons under the age of 11. Persons aged from 6 to 10 are assumed to be full time students.

Dwelling Unit Type

Townhouse was added as a dwelling unit type since 1996.

Transit Pass, Occupation, No Work Trip

Possession of a transit pass, occupation description and confirmation if a full-time employed person did not make a work trip on the trip day were collected since 1996.

Sample Selection

The 1986 and 1996 surveys were based on a random selection of households throughout the survey area, 4.2% in 1986 and 5.0% in 1996. The 1991 survey used different sampling rates for high and low growth areas. The target was 5% in the high growth areas and 0.5% in the low growth areas. There was significantly more variance due to random sampling in the 1991 data than for 1986 and 1996, particularly in those areas sampled predominantly at the 0.5% rate such as City of Toronto. The 2001 survey did not consist of a random selection of households. The sample selection and sample control process were based on Forward Sortation Areas (FSAs) – the 1st 3 characters of the postal code. Some FSAs were sampled at a higher rate than others were, and within most FSAs, apartment buildings are known to be under-represented relative to other types of housing. The 2006 survey was originally based on a random selection of households throughout the survey area. Analysis of phase 1 interview statistics showed the response rate was 16% higher for single units. In order to compensate for the low response rate for multi units (i.e. apartments), a higher sample rate was used in the later interview phases. For more information on sample selection, please refer to "2006 Transportation Tomorrow Survey: Design and Conduct of the Survey, October 2008".

Interview Language

The language in which interviews were conducted was recorded but is not included in the final database since it was not considered to be a meaningful piece of information with respect to either household demographics or travel behaviour. The following table provides a summary of the number of non-English interviews conducted in the 1986, 1996, 2001 and 2006 surveys. There were virtually no non-English interviews conducted in 1991 due to software related problems.

2 Data Expansion

The data for each of the surveys has been expanded to represent the total population of the survey area in the year of the survey. With the exception of the 2001 survey, expansion factors had been calculated based on geographic areas, called expansion zones. The number of dwelling units in each expansion zone was obtained from the Canada Census and used as the control total for calculating the expansion factor. The same expansion factor is applied to all the households in an expansion zone and to all household, person and trip data associated with each household. In the 2001 survey, forward sortation areas (FSA) were used as expansion zones.

Details of the expansion process and the expansion factors used in the 1986, 1991, 1996 and 2001 surveys are contained in the individual data guides and expansion reports for those years. Details of the 2006 data expansion are contained in the report "2006 TTS Working Paper: Data Expansion". The following table provides a summary by planning district and compares the expanded totals from the survey, both for dwelling units and for population, with data from the 2006 census. Note that there are differences between FSAs and municipal boundaries. Therefore, there are some minor discrepancies in some municipalities between the expanded number of households and the number of dwelling units recorded in the census.

Differences in population result from a difference in household size being recorded in the survey relative to that obtained in the census. In addition the census population data included the inhabitants of collective residences, such as hospitals, nursing homes, prisons and reformatories, although they are not included in either the survey or the census dwelling unit count. A large part of the survey was carried out in the fall whereas the census data was collected in May. The difference in timing could result in some differences in population particularly in areas with a significant post secondary school population. The reported difference in total population between the 2006 survey and the census at 2.8% compares with the differences of 2.8%, 2.4%, 2.8% and 2.9% in the 1986, 1991, 1996 and 2001 surveys respectively.

The survey data for the Regional Municipalities of Niagara and Waterloo, the Counties of Dufferin, Peterborough, Simcoe and Wellington, the Cities of Barrie, Brantford, Guelph, Kawartha Lakes, Orillia, and Peterborough, and the Town of Orangeville were collected in the Fall of 2005. The GTA being the Regions of Durham, Halton, Peel, York, City of Hamilton and City of Toronto were surveyed in the Fall of 2006. All survey data, regardless of date collected were expanded in the same manner using the 2006 census data.

4 Traffic Zones

Although the zone system used in the TTS surveys is called GTA zone system, it extends to the areas external to GTA. The following table illustrates the correspondence between the revised GTA zone numbering and the internal zone numbering system used by each non-GTA agency.

General Codes

The codes '0' and '8888' are used where a traffic zone specification is not applicable. Individuals who are not employed or are not students are assigned a zone code of '0' in the applicable zone field. Individuals who have no usual place of work or school are assigned the code to '8888' in the zone field.

'9998' identifies points that are external to the survey area.

'9999' identifies points that are unknown.

5.6 Transit Route Codes

The following lists contain only operator and route codes used in coding the responses to the 2006 TTS. The lists therefore do not necessarily include all routes in the respective transit system or those used in 1986, 1991, 1996 and 2001. The numbers given are the expanded 24-hour totals from the 2006 survey.

6 Control Totals For TTS

6.1 Household Tabulations

The following tabulations are “number of households” stratified by various categories in the database. The “Number of Records” is the actual number of survey records in the Household file while the “Expanded Frequency” is the total after the expansion factors have been applied.

6.3 Trip Tabulations

The following tabulations are “number of trips” stratified by various categories in the database. The “Number of Records” figures present the actual number of survey records in the Trip file while the “Expanded Frequency” figures are the expanded results representing the universe. Trips are collected for persons aged 6 and over in 1986 and for persons aged 11 and over in 1991, 1996, 2001 and 2006.

6.4 Transit Tabulations

The following tabulations are “number of transit trips” stratified by various categories in the database. The “Number of Records” figures present the actual number of survey records in the Transit file while the “Expanded Frequency” figures are the expanded results representing the universe. Trips are collected for persons aged 6 and over in 1986 and for persons aged 11 and over in 1991, 1996, 2001 and 2006.

* Durham Transit figures were calculated by summing the totals for Pickering, Ajax, Whitby, Bowmanville, Oshawa and Uxbridge. Bowmanville was counted as Other in previous surveys.

Notes:

- The number of trips for the TTC and GO has been calculated from the number of trip records for which the appropriate field: n_subway (TTC subway & RT), n_ttc_bus (TTC bus and streetcar), n_go_rail (GO rail), n_go_bus (GO bus) is greater than zero. The other totals are tabulated from the oper_code field (last non-TTC, no-GO route).
- The trip total does not match the total in the previous tabulations due to the double counting of people who use a combination of TTC, GO Transit and other municipal transit services.
